SkillGauge AI – Interview Assessment Report

Email: vishwa.mv2003@gmail.com
Report Date: 2026-01-31 21:30:18

1. Which feature distinguishes Python as a programming language regarding variable assignment compared to C?
A) Dynamic Typing ✓
B) Static Compilation
C) Explicit Memory Management
D) Strict Header Inclusion

2. In the C programming language, which standard library function is used for dynamically allocating a specific amount of memory?
A) malloc()
B) new()
C) alloc() ✗
D) reserve()

3. Which type of SQL JOIN returns all rows from both tables, filling in NULLs where there are no matches?
A) FULL OUTER JOIN
B) INNER JOIN ✗
C) LEFT JOIN
D) CROSS JOIN

4. What is the primary function of the HTML `` tag?
A) To contain all visible page content and elements ✓
B) To define metadata about the HTML document
C) To link external CSS files
D) To specify the document's character set

5. In CSS, which selector has the lowest specificity?
A) Element selector (e.g., `p`)
B) Class selector (e.g., `.intro`) ✗
C) ID selector (e.g., `#main`)
D) Inline style

6. In a typical ML Pipeline, which stage immediately follows Data Collection and Cleaning?
A) Feature Engineering
B) Model Deployment
C) Business Understanding ✗
D) A/B Testing

7. Which iterative optimization technique is most commonly used during Model Training to minimize the loss function?
A) Gradient Descent
B) Principal Component Analysis (PCA)
C) K-Means Clustering ✗
D) Bootstrap Aggregating

8. In Model Evaluation for binary classification, which metric measures the proportion of actual positive cases that were correctly identified?

A) Recall (Sensitivity)
B) Precision ✗
C) Specificity
D) Accuracy

9. What Git command is used to download or clone a remote repository to your local machine?
A) git clone
B) git fork
C) git push ✗
D) git checkout

10. In VS Code, which built-in feature allows developers to execute code line-by-line, inspect variables, and set breakpoints?
A) The Debugger
B) The Terminal ✗
C) The Source Control view
D) IntelliSense

11. Dataiku DSS (Data Science Studio) is primarily known as a platform for:
A) End-to-end collaborative data science and machine learning lifecycle management
B) High-performance computing clusters only
C) A proprietary relational database management system ✗
D) Network security monitoring

12. TIBCO Spotfire is a software application most prominently used for:
A) Interactive data visualization and business intelligence
B) Container orchestration
C) NoSQL database hosting ✗
D) Server-side language compilation

13. Google BigQuery is characterized by its architecture as a:
A) Serverless, highly scalable, and cost-effective data warehouse
B) Traditional OLTP relational database system
C) Block storage service for virtual machines ✗
D) In-memory key-value store

14. Which field focuses on extracting knowledge and insights from structured and unstructured data using scientific methods, processes, algorithms, and systems?
A) Data Science
B) Data Warehousing
C) IT Infrastructure Management ✗
D) Software Quality Assurance

15. Which term describes the broad effort to enable machines to mimic cognitive functions associated with human minds, such as learning and problem-solving?
A) Artificial Intelligence (AI)
B) Robotics ✗
C) Computer Networking
D) Database Administration

16. Machine Learning (ML) is fundamentally distinct from traditional programming because ML systems:
A) Learn patterns and make decisions from data without explicit programming rules

B) Are always implemented using only Python
C) Require dedicated graphics hardware (GPUs) for all tasks ✗
D) Only solve classification problems

17. Which technology within the AR VR MR spectrum involves combining real-world and synthetic objects in an environment where they can interact with each other?
A) Mixed Reality (MR)
B) Virtual Reality (VR)
C) Augmented Reality (AR) ✗
D) Extended Reality (XR)

18. Which Google Cloud service provides a fully managed environment for hosting and running containerized applications?
A) Google Kubernetes Engine (GKE) ✓
B) Cloud Firestore
C) Cloud Storage
D) Cloud CDN

19. What is the primary responsibility of Front End Development?
A) Building and optimizing the user interface and user experience (UI/UX)
B) Managing server logic and database connections
C) Deploying containerized microservices ✗
D) Handling network security protocols

20. Flask is a popular Python framework primarily categorized as a:
A) Micro-framework
B) Full-stack framework (like Django)
C) ORM (Object Relational Mapper) ✗
D) Data visualization library

21. What type of data structure does MongoDB use to store information?
A) JSON-like Documents (BSON)
B) Relational Tables
C) Key-Value Pairs only ✗
D) Graph Nodes and Edges

22. In Microsoft Excel, which function searches for a value in the first column of a table array and returns a value in the same row from a column you specify?
A) VLOOKUP
B) SUMIF
C) COUNTIFS
D) CONCATENATE ✗

23. Which type of Visualization is most appropriate for showing the distribution of a single continuous variable?
A) Histogram ✓
B) Scatter Plot
C) Bar Chart
D) Pie Chart

24. Predictive Models are primarily utilized in data science for what purpose?
A) Forecasting future outcomes or probabilities based on known inputs
B) Defining data storage architecture ✗
C) Ensuring data consistency across distributed systems

D) Analyzing historical data without making forecasts

25. Xception is a deep learning architecture notable for its heavy use of:
A) Depthwise Separable Convolutions
B) Recurrent Neural Networks (RNNs)
C) Generative Adversarial Networks (GANs)
D) Long Short-Term Memory (LSTM) cells ✗

FINAL SCORE: 4/25
Percentage: 16.0%
